

SLIMATIC BLAINE

The Slimatic Blaine is adaptable to any Blaine apparatus or can be supplied with a Blaine apparatus.

It measures the amount of time required by the manometer fluid to pass the graduation lines without having to attend to the apparatus manually. This frees the operator to perform other tasks.

Since the equipment does not alter the basic function of the test method, it complies with both ASTM and CSA requirements.

Properties and Advantages:

- ✓ No more human errors
- ✓ Extremely accurate
- ✓ Reliable
- ✓ Money and time saving
- ✓ Neat Look
- ✓ Time can be measured manually at any moment
- ✓ Automatic air evacuation thus avoiding any spilling or loss in the manometer fluid if installed as recommended.
